

## *A Plan to Study Through the Bible in 4 ½ Years*

We all know that studying through or even reading through the entire Bible is a massive undertaking. So how do you accomplish it? Like eating the proverbial elephant, we do it one bite at a time. Since we can never get to the bottom of God's word, we'll pick a convenient time period of one month. The idea is to study what you can in a month. Then move on to another book. With this plan you will come back around in 4 ½ years and get to build on what you already have. Write notes as you learn, so you will be able to come back to it.

We also know that the Bible is made up of short books and long books, of historical books and prophetic books, of epistles and poetry. Here is a plan that will both give variety of content and help to even out the length of material to study. And it will take you through the entire word of God, so that you do not have big gaps in your Bible knowledge.
